CAREER OBJECTIVE

Computer Science undergraduate specializing in AI & Data Science, with hands-on experience in Python, data analysis, machine learning, Generative AI, and real-world data visualization. Built data-driven applications using ISRO Aditya-L1 and ARGO oceanographic datasets, with experience in preprocessing, analysis, prediction, RAG, and interactive dashboards.

EDUCATION

JECRC University

Bachelor of Technology in Computer Science | CGPA: 8.21

Jaipur

Sep. 2024 – Aug. 2028

PROJECTS

Solar Rangers | Python, HTML, CSS, JavaScript, React

[GitHub Link](#)

- Processed and analyzed 1.59M+ observations from ISRO Aditya-L1 SoLEXS and HEL1OS datasets using Python and Pandas to identify solar-flare patterns and anomalous activity.
- Developed a solar-flare detection and forecasting pipeline to predict flare probability, class (B/C/M/X), and lead time for early-warning applications.
- Built an interactive monitoring dashboard with React and Plotly for real-time visualization of solar activity, flare events, and mission data.

FloatChat | Python, Streamlit, LangChain, FAISS, Google Gemini, Plotly

- Processed and explored ARGO oceanographic datasets using Python, Pandas, and Plotly to analyze ocean parameters and geographic float distributions.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using LangChain and FAISS, enabling semantic search and natural-language querying over oceanographic data.
- Built an interactive Streamlit dashboard with Plotly and Folium for dataset exploration, geospatial visualization, and AI-assisted analysis.

EXPERIENCE

Training & Placement Office (TPO) Intern

Mar 2026

- Managed and organized placement and attendance datasets for 2,252+ students using Microsoft Excel, ensuring accurate records and structured reporting.
- Analyzed attendance and recruitment data to support CRT coordination and placement-related decision making.
- Collaborated with the Training & Placement Office to support recruitment drives, event logistics, and coordination between students, faculty, and recruiters.

Mentor India Academy Intern (NITI Aayog)

Mar 2026

- Contributed to innovation and entrepreneurship initiatives under the Mentor India Academy program.
- Collaborated with mentors and participants to support learning activities and knowledge sharing.
- Developed communication, coordination, and teamwork skills while working on innovation-focused programs.

SKILLS

Programming : Python, SQL, JavaScript, C++

Data Science : Pandas, NumPy, Matplotlib, Scikit-learn

Data Visualization : Plotly, Streamlit, Power BI

Databases : MySQL/PostgreSQL, SQL

Developer Tools : VS Code, Git, GitHub, Postman

EXTRA-CURRICULAR ACTIVITIES

Certifications & Achievements

- AWS Networking Basics** – AWS Training & Certification
- Cloud Computing** – NPTEL
- Qualified for the Smart India Hackathon (SIH) institutional level.
- Coordinator** at Zarurat, leading volunteer activities and community outreach initiatives.

Jul 2025
